## Two Wires. Less Time.

Honeywell Zio® Wall Modules drastically reduce installation time and give you the flexibility to cover more applications. Installation is a breeze whether you're doing a retrofit or new construction, helping you save time on every job.

From the Zio Lite to the full-featured Zio Plus, there's a perfect — and easy-to-install — choice for every job.

## Installation That's Smooth As Sylk™

All Zio Wall Modules are Sylk enabled to save you installation time. Sylk is a two-wire polarity-insensitive communications bus that keeps things simple. With just two wires, Sylk:

- Carries power and communications between Sylk-enabled controllers and sensors
- Frees up inputs/outputs on the controller for more installation and programming flexibility
- Cuts installation time for you and installation costs for your customers

# Zio Lite

## Simple and Easy

It's Simple. The Zio Lite is designed to help you win more bids. Its sleek design and easy-to-use interface make it an easy sell for you. Plus, Zio Lite offers a model that is packaged with temperature, humidity and CO<sub>2</sub> sensing — all on only two wires.

**Simple 2-wire** installation

**Easy-to-use** interface

**Compatible** with Spyder® Sylk™-enabled controllers

Model is available **with and without a display** and with or without humidity and/or CO<sub>2</sub>

**Integrated CO<sub>2</sub> sensor** allows you to implement Demand Control Ventilation strategies to meet ventilation requirements and reduce building operating costs

**Great for retrofits** — Zio Lite reuses just two of the existing wires even for models with humidity and CO<sub>2</sub>

# Zio and Zio Plus

## Unmatched Access and Control

For outstanding network control right from the wall module, you can't beat Zio and Zio Plus. From the fast two-wire installation using the Sylk bus to unmatched programming flexibility.

**Simple 2-wire** installation

**Compatible** with Spyder Sylk-enabled controllers

Models available **with temperature only or temperature and humidity**

**Access and change** almost any point in the controller, including scheduling (Zio Plus)

**Customizable screen** layout to fit different applications and end-user needs

**Link setpoint limits**, fan, and system settings to network variables - no Spyder download needed

**Any combination** of up to four Zio and Zio Plus modules can be installed on a single Sylk bus
